The Wolverine X2's Alu compact short-wheelbase chassis is built to handle technical terrain with total confidence. The ground clearance and vehicle geometry combine to give a "planted" feeling with ultimate terrain ability.

While our 850cc parallel twin engine delivers impressive power, on-board conversation is still easy thanks to the X2 Alu's ultra-low noise and vibration levels. Increased adjustability of the seat, seatbelt and steering wheel, together with new-shape pedals bring even better comfort and control.

With our wide range of integrated Genuine accessories, it's very easy to create your very own personal Wolverine X2 Alu.

- Agile and easy-handling Yamaha two-seat Side-By-Side
- Advanced ergonomic design updates for 2021 models
- High levels of capability, comfort and confidence
- Amazing versatility – ideal for leisure and light utility use
- SE piggy-back shocks and 27" Dirt Commander tyres
- 850cc parallel 2-cyl engine – anywhere, any time power!
- New ECU mapping update – smoother low-speed control
- Compact and agile chassis, low centre of gravity
- Confident all-terrain capability and versatility
- Speed Management system – 25 mph limit when needed

Wolverine X2 850 Alu

Powerful 850cc twin cylinder engine

The 850cc parallel twin cylinder engine produces high levels of linear torque, giving the X2 Alu the ability to carry 2 adults and their cargo across technical and hilly landscapes with ease. Power delivery is potent across the speed range but a special ECU mapping update for the 2021 model year now gives even smoother power and control at low speed.

Compact and agile chassis

Form really follows function in the versatile 2021 Wolverine X2 Alu. Its compact chassis features a short wheelbase of only 2,125 mm, so with the newly designed ROPS (Roll Over Protection System) which is sleeker and narrower – allowing for better all-round visibility – this machine is great on tight trails. The new, wider door design makes for even easier access.

Quiet and comfortable interior

We've gone to great lengths to make sure that you and your passengers are able to enjoy a quiet and relaxing ride. The large volume intake and exhaust systems drastically reduce engine noise and make conversations between occupants easy to hear – while the rubber engine mountings and extensive chassis insulation minimise footboard vibration.

KYB Piggy-Back Shocks front & rear

The suspension can be tuned to your personal preference – and terrain conditions – with the KYB gas-charged Piggy-Back shocks. These top spec units, with their Hi and Low speed compression and single rebound adjustment, provide excellent ground contact for maximum grip – optimising the advantage of the new and impressive 27" Dirt Commander tyres.

Full-size high-back seats

The Wolverine X2 Alu is equipped with full-size seats that are designed to accommodate driver & passenger in comfort. These luxurious high-back seats ensure that you and your passengers experience a relaxing and enjoyable ride – even on the most extreme terrain.

Adaptable and versatile layout

Increased adjustability of key design elements is a new feature of the 2021 model. More comfort, security and control can be obtained by adjusting the seat and seatbelt positions and degree of steering wheel tilt to suit the driver's preferences and the terrain conditions. New-shape pedals also play their part in bringing even greater comfort and control.

Engine

Engine type	Liquid-cooled;4-stroke;DOHC;Parallel Twin
Displacement	847cc
Bore x stroke	82.0 mm x 80.2 mm
Compression ratio	10.5 : 1
Lubrication system	Dry sump
Fuel system	Mikuni fuel injection with Drive by wire, dual 36mm throttle bodies
Ignition system	TCI
Starter system	Electric
Transmission system	Yamaha Ultramatic® CVT automatic V-belt
Drive system	On-Command® 2WD, 4WD, 4WD with Diff-lock
Final transmission	Shaft

Chassis

Front suspension system	Independent Double Wishbone with Anti-Sway Bar, 221 mm of wheel travel with spring preload adjustability;Hi & Low speed compression and rebound adjustment;KYB Piggy back shocks with threaded spring preload
Rear suspension system	KYB Piggy back shocks with threaded spring preload;Hi & Low speed compression and rebound adjustment; [236mmofwheeltravelKYBPiggybackshocks]
Front brake	Dual hydraulic disc
Rear brake	Dual hydraulic disc;Shaft mounted parking brake
Front tyres	27" Dirt Commander tyres / 12" Aluminium rims
Rear tyres	27" Dirt Commander tyres / 12" Aluminium rims

Dimensions

Overall length	2,920 mm
Overall width	1,580 mm
Overall height	1,913 mm
Wheelbase	2,125 mm
Min. turning radius	4.5 m
Minimum ground clearance	293 mm
Wet weight (including full oil and fuel tank)	719.5 kg
Fuel capacity	35 L
Oil capacity	4.4 L

Loading limits

Cargo bed	272 kg
-----------	--------

Additional feature

Steering system	Rack and Pinion Steering Assembly with Electric Power Steering
Towing capacity	907 kg
	Digital LCD meter with fuel gauge, speedometer, odometer, trip meter, maintenance meter, hour meter, 2WD/4WD/Diff-Lock Indicator, L/H/N/R gear indicator, parking brake indicator, engine warning light, water temperature warning light and gauge, Battery Warning Indicator, Speed Management System Key Indicator, high beam indicator, EPS warning light

The specification and appearance of Yamaha products will be varied from time to time without notice, and those shown here are for illustrative purposes only and are not contractual descriptions of products. Some models are shown with optional accessories. Yamaha Side-by-Side Vehicles are built to operate within their design limits. Safe towable weights, together with maximum carrying capacity are identified in the owner's manual if applicable. For durability, reliability, but most important of all, operator and passenger safety, under no circumstances should the recommended capacities be exceeded. Our Side-by-Side Vehicles are recommended for use only by riders of 16 years and older.
